

Anti-PfRH5 [9AD4] Bulk Size Ab00464-23.0-BT

Isotype and Format: Rabbit IgG, Kappa

Clone Number: 9AD4

Alternative Name(s) of Target: P. falciparum RH5; Plasmodium falciparum Reticulocyte-binding Protein Homologue 5

UniProt Accession Number of Target Protein: B2L3N7

Published Application(s): Block, ELISA

Published Species Reactivity: Plasmodium falciparum

Immunogen: Human adenovirus serotype 5 (AdHu5).

Specificity:

Application Notes: The antibody binds specifically to PfRH5, a member of the RH family of proteins of the Plasmodium falciparum which interacts with the surface protein basigin (CD147) of erythrocytes. The interaction between the two proteins is necessary for the parasitic invasion of erythrocytes, known to give rise to the pathology of malaria. The antibody 9AD4 inhibits parasitic growth, possibly by blocking the interaction of PfRH5 and another protein, or by blocking the processing of the PfRH5 protein.

Antibody First Published in: Wright et al. Structure of malaria invasion protein RH5 with erythrocyte basigin and blocking antibodies. Nature 515 (7527), 427-430 (2014) [PMID:25132548](#)

Note on publication: Describes the role of the reticulocyte-binding protein homologue family of proteins found in Plasmodium falciparum, of which RH5 is necessary for erythrocyte invasion. This is essential to the life cycle of the parasite, and is responsible for the development of malaria. Antibodies against PfRH5, such as 9AD4 and QA1, prevent parasite growth and have the potential to be used therapeutically in malaria vaccines.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic

procedures for humans or animals.
