

Anti-Influenza A HA [FLD20] Standard Size Ab00249-23.0

Recombinant monoclonal antibody to Influenza A HA. Manufactured using AbAb's Recombinant Platform with variable regions (i.e. specificity) from the EBV transformed human B cell clone FLD20.

Isotype and Format: Rabbit IgG, Kappa

Clone Number: FLD20

Alternative Name(s) of Target: haemagglutinin; hemagglutinin

UniProt Accession Number of Target Protein:

Published Application(s): NTRL

Published Species Reactivity: H5N1 Influenza A Virus

Immunogen: Made by immortalizing IgG-expressing B cells from patients who had recovered from infections with HPAI H5N1 Viruses.

Specificity: This clone can neutralize the hemagglutinin (HA) of a H5N1 strain of influenza A Virus and has been shown to neutralize both Clade I and Clade II H5N1 viruses.

Application Notes:

Antibody First Published in: Simmons et al. Prophylactic and therapeutic efficacy of human monoclonal antibodies against H5N1 influenza. PLoS Med. 2007 May;4(5):e178. [PMID:17535101](#)

Note on publication:

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
