

## Anti-Tissue factor [5G9] Standard Size Ab00516-10.6

This is a Fab fragment with a his-tag.

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

**Isotype and Format:** Human Fab fragment, His-Tagged, Kappa

**Clone Number:** 5G9

**Alternative Name(s) of Target:** TF; platelet tissue factor; factor III; thromboplastin; CD142

**UniProt Accession Number of Target Protein:** P13726

**Published Application(s):** WB, Block, ELISA

**Published Species Reactivity:** Human

**Immunogen:** Human TF.

**Specificity:**

**Application Notes:** The antibody binds specifically to TF, a hemostatic protein which is involved in the extrinsic pathway of coagulation. TF is receptor for circulating serine protease factor VIIa, activating the catalytic VIIa protease domain. The complex formed functions to activate the zymogen factor X into activated factor Xa, which then catalyses the formation of Prothrombin to Thrombin. The pathways results in a fibrin clot which acts to stop bleeding. The monoclonal antibody 5G9 acts as a competitive inhibitor of factor X, thereby inhibiting its activation by the TF.VIIa complex and the formation of a clot.

**Antibody First Published in:** Ruf W, Edgington TS. An anti-tissue factor monoclonal antibody which inhibits TF.VIIa complex is a potent anticoagulant in plasma. Thromb Haemost. 1991 Nov 1;66(5):529-33.

[PMID:1803616](#)

**Note on publication:** Describes the production of a murine monoclonal antibody directed against TF, and inhibits the complex of TF which Factor VIIa, thereby acting as an anticoagulant in plasma.

## Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Purified by Immobilized Metal Affinity Chromatography

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -

20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
