

## Anti-Cashew Allergen [X467] Standard Size Ab01097-13.0

This chimeric human antibody was made using the variable domain sequences of the original Mouse format, for improved compatibility with existing reagents, assays and techniques.

**Isotype and Format:** Human IgG4, Kappa

**Clone Number:** X467

**Alternative Name(s) of Target:** Legumin-like protein

**UniProt Accession Number of Target Protein:**

**Published Application(s):** ELISA

**Published Species Reactivity:** Anacardium occidentale (Cashew)

**Immunogen:** This antibody was raised by immunising mice with purified cashew allergen.

**Specificity:** This antibody recognises a major cashew allergen.

**Application Notes:** Specificity of this antibody was confirmed by ELISA tests. Its engineered IgE and human IgG4 versions might be used as controls in in vitro and in vivo allergy models. Finally, engineered IgG4 version of this antibody can be utilised in the research on the therapy of allergies using IgGs to block free allergen in the system of an allergic organism and prevent the allergen binding to IgEs (Orengo et al., 2018).

**Antibody First Published in:** [PMID:](#)

**Note on publication:**

### Product Form

**Size:** 100 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
