

Anti-Asp f9 [5C6] Bulk Size Ab01408-14.0-BT

Isotype and Format: Human IgE, Kappa

Clone Number: 5C6

Alternative Name(s) of Target: A. fumigatus Allergen; Asp f 9; Aspf9; probable glycosidase crf1; Crh-like protein 1; glucanase; allergen: Asp f 9; allergen Asp f 9

UniProt Accession Number of Target Protein: Q8J0P4

Published Application(s): IP, WB, ELISA

Published Species Reactivity: Aspergillus fumigatus (Neosartorya fumigata)

Immunogen: 5C6 antibody was raised using a novel technique: mononuclear cells were taken from the human subjects with allergic bronchopulmonary aspergillosis and then screened for IgE secretion. Subsequently, they were used to generate hybridomas of which some were secreting anti-Asp f 9 IgE.

Specificity: This antibody recognises Asp f 9.

Application Notes: A target of the 5C6 antibody (Asp f 9) was confirmed through IP and mass spectrometry (Wurth et al., 2018). ELISA: this antibody detected Asp f 9 in a commercial Aspergillus extract ALKB in ELISA (Wurth et al., 2018). WB: 5C6 antibody was successful in detecting Asp f 9 in western blot samples from Aspergillus extracts HS and AlgryL (Wurth et al., 2018).

Antibody First Published in: Wurth et al. Human IgE mAbs define variability in commercial Aspergillus extract allergen composition JCI Insight. 2018 Oct 18;3(20). pii: 123387. doi: 10.1172/jci.insight.123387.

[PMID:30333320](#)

Note on publication: The article describes a method of generating Aspergillus-reactive IgE-secreting human hybridomas (among them these secreting this antibody). Subsequently, the antibody is characterized and its specificity is determined. Finally, this antibody is used to determine a potential presence of its antigen in the commercially-available Aspergillus samples used in diagnosis and treatment of Aspergillus-related allergies.

Product Form

Size: 500 µg Purified antibody in bulk size.

Purification: Affinity Purified using a recombinant lectin column

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
