

Anti-Cytotoxin 1 [TPL0027_01_A2] Standard Size Ab01641-30.11

This is an scFv fragment with a His tag.

Isotype and Format: scFv fragment (His), ScFv

Clone Number: TPL0027_01_A2

Alternative Name(s) of Target: CTX1; CX1; Cardiotoxin F8; Cardiotoxin-I; CTX-I; Toxin CM-6; toxin CX1

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Naja nigricollis

Immunogen: The antibody was raised using IONTAS phage display library, a naïve human scFv library consisting of $4.0 \cdot 10^{10}$ unique antibody fragments. Through phage display selection, scFv-presenting phages were allowed to bind a toxin, phages with unspecific binding were washed away, and the rest were eluted through enzymatic digestion. These were then amplified and used for the following round. In total three rounds of selections were completed leaving the best binders behind.

Specificity: TPL0027_01_A2 antibody recognizes cytotoxin 1, which is one of the major toxins in the venom of the black-necked spitting cobra (Naja nigricollis).

Application Notes: TPL0027_01_A2 antibody has a very high affinity to the cytotoxin 1. It was demonstrated by normalized ELISA, which circumvents the limitation of a simple ELISA by removing the expression variable, normalizing the amount of scFv in each well. The antibody's high affinity was confirmed by its ability to bind the target protein in a venom fraction even at 1:32,000 dilution ($3.125 \cdot 10^{-2}$ µg/mL (Jürgensen et al., 2019 [poster])). It is recommended for the research on the antitoxin against Naja nigricollis snakebites.

Antibody First Published in: Jürgensen et al. Harnessing monoclonal antibodies for development of a specific treatment against Naja nigricollis envenoming. 10.13140/RG.2.2.24771.14884. [PMID:](#)

Note on publication: This poster describes the generation and characterization of this anti-cytotoxin 1 antibody among other antibodies directed against the venom toxins of Naja nigricollis.

Product Form

Size: 50 µg Purified antibody.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In:

PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
