

Anti-MVP [3F9-3] Standard Size Ab02495-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Rabbit IgG, Kappa

Clone Number: 3F9-3

Alternative Name(s) of Target: Major vault protein

UniProt Accession Number of Target Protein: Q9DGM7

Published Application(s): WB, IHC

Published Species Reactivity: Vertebrates

Immunogen: This antibody was raised by immunizing six-week old female Blab/c mice with catfish rMVP.

Specificity: Specific to major vault protein. MVP is required for normal vault structure. Vaults are multi-subunit structures that may act as scaffolds for proteins involved in signal transduction. Vaults may also play a role in nucleo-cytoplasmic transport (By similarity).

Application Notes: This antibody is recommended for the detection and analysis of the major vault protein (MVP).

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
