

## Anti-IL-1B [3] Standard Size Ab02592-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

**Isotype and Format:** Rabbit IgG, Kappa

**Clone Number:** 3

**Alternative Name(s) of Target:** Interleukin IL1-beta; chIL-1B-1; Interleukin-1; chIL-1B

**UniProt Accession Number of Target Protein:** O73909

**Published Application(s):** WB;, ELISA

**Published Species Reactivity:** Chicken

**Immunogen:** The original antibody was raised immunising BALB/C mice with recombinant chicken IL-1B protein.

**Specificity:** The antibody is specific for chicken IL-1 $\beta$ , a pleiotropic molecule with a wide spectrum of activities including metabolic, physiologic, hematologic, and immunologic effects. The antibody did not react with chicken IL-18.

**Application Notes:**

**Antibody First Published in:** Lee et al. Development and characterization of mouse monoclonal antibodies reactive with chicken IL-1 $\beta$  Poult Sci. 2014;93(9):2193-2198. [PMID:25037821](#)

**Note on publication:** The paper describes the generation and characterization of the antibody, which is specific for chIL-1 $\beta$ .

## Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
