

Anti-Ghana Virus G [10C4-LY] Standard Size Ab02871-10.29

This is a Fab fragment with His tag.

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human Fab fragment, His-Tagged, Kappa

Clone Number: 10C4-LY

Alternative Name(s) of Target: Glycoprotein; Ghana virus glycoprotein

UniProt Accession Number of Target Protein:

Published Application(s): IP, WB, ELISA

Published Species Reactivity: Ghana virus

Immunogen: The original version of this antibody was raised against glycoprotein (G) from the Ghana virus.

Specificity: This antibody is specific to the glycoprotein (G) from the Ghana virus.

Application Notes: This antibody can be used for the detection and analysis of the glycoprotein (G) of the Ghana virus via ELISA, IP and Western blot.

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 100 µg Purified antibody.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
