

Anti-Ghana Virus F [7C11-LY] Standard Size Ab02874-10.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgM format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgG1, Fc Silent™, Kappa

Clone Number: 7C11-LY

Alternative Name(s) of Target: fusion protein; F protein; Ghana virus fusion protein

UniProt Accession Number of Target Protein:

Published Application(s): IP, ELISA

Published Species Reactivity: Ghana virus

Immunogen: The original version of this antibody was raised against the fusion (F) protein from the Ghana virus.

Specificity: This antibody is specific to the fusion protein from the Ghana virus.

Application Notes: This antibody can be used for the detection and analysis of the fusion (F) protein of the Ghana virus via ELISA and IP.

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
