

Anti-CD206 [6D5] Bulk Size Ab03382-10.0-BT

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG1 format for improved compatibility with existing reagents assays and techniques.

Isotype and Format: Human IgG1, Kappa

Clone Number: 6D5

Alternative Name(s) of Target: MRC1; MMR; hMR; CLEC13D; CLEC13DL; MRC1L1Macrophage mannose receptor 1; C-type lectin domain family 13 member D; C-type lectin domain family 13 member D-like; human mannose receptor; Macrophage mannose receptor 1-like protein 1

UniProt Accession Number of Target Protein: P22897

Published Application(s): ELISA

Published Species Reactivity: Human

Immunogen: The original antibody was generated by immunizing BALB/c mice with recombinant human CD206 crosslinked with the MBS-KLH connector.

Specificity: This antibody is specific for human CD206. This antibody mediates the endocytosis of glycoproteins by macrophages. Its binds both sulfated and non sulfated polysaccharide chains.

Application Notes: The binding specificity of this antibody to human CD206 was determined using ELISA. The scFv version antibody was used in the generation of antibody-drug conjugate (CN113512117)

Antibody First Published in: [PMID:](#)

Note on publication:

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
