

## Anti-CD206 [6D5] Standard Size Ab03382-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Rabbit IgG, Kappa

**Clone Number:** 6D5

**Alternative Name(s) of Target:** MRC1; MMR; hMR; CLEC13D; CLEC13DL; MRC1L1Macrophage mannose receptor 1; C-type lectin domain family 13 member D; C-type lectin domain family 13 member D-like; human mannose receptor; Macrophage mannose receptor 1-like protein 1

**UniProt Accession Number of Target Protein:** P22897

**Published Application(s):** ELISA

**Published Species Reactivity:** Human

**Immunogen:** The original antibody was generated by immunizing BALB/c mice with recombinant human CD206 crosslinked with the MBS-KLH connector.

**Specificity:** This antibody is specific for human CD206. This antibody mediates the endocytosis of glycoproteins by macrophages. Its binds both sulfated and non sulfated polysaccharide chains.

**Application Notes:** The binding specificity of this antibody to human CD206 was determined using ELISA. The scFv version antibody was used in the generation of antibody-drug conjugate (CN113512117)

**Antibody First Published in:** [PMID:](#)

**Note on publication:**

## Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
